ACADEMIC ENGINEERING PROJECTS

Developing a Digital Clock – PREFACE Program – August 2023
- Using Java implemented a basic 12-hour, digital clock that followed the criteria of:
    * Displayed the current time in format: HH:MM: SS, AM, or PM
    * Displayed the current date in format: Day of week, MM-DD-YYY
    * Clock updated in its display every second
    * Used a graphical user interface (GUI) to showcase the clock

Buckeye CTF– Hacking Competition – November 2023
- Capture the flag hacking competition in which teams compete to obtain "flags" by solving security-based problems. Used Wireshark as application tool.

[Personal Portfolio Website](#) – February 2024
- Created my own portfolio website from scratch using only HTML, CSS and JavaScript.

WORK EXPERIENCE

Uncle Giuseppe's Marketplace, North Babylon, New York
Grocery Clerk, March 2023 – July 2023; part-time
- Oversaw daily tasks and operations of the grocery department. Included managing inventory, scheduling, and training team members, and ensuring that our customers received the best possible service.

Porter, September 2022 – March 2023; part-time
- Kept the store clean and organized by sweeping and mopping the floors, stocking shelves, assisting customers, and ensuring that the restrooms are clean and well-stocked.
